

Spatial Survival Guide

Harvard Museum Studies x Learning Design

1. The Basics: Movement & Camera

- Move: Use WASD keys.
- Run: Hold Shift while moving.
- Jump: Spacebar.
- Zoom: Use trackpad or Up/Down arrows.
- Camera Options: Look for Auto Rotate, Drag to Rotate, and Pointer Lock in settings.

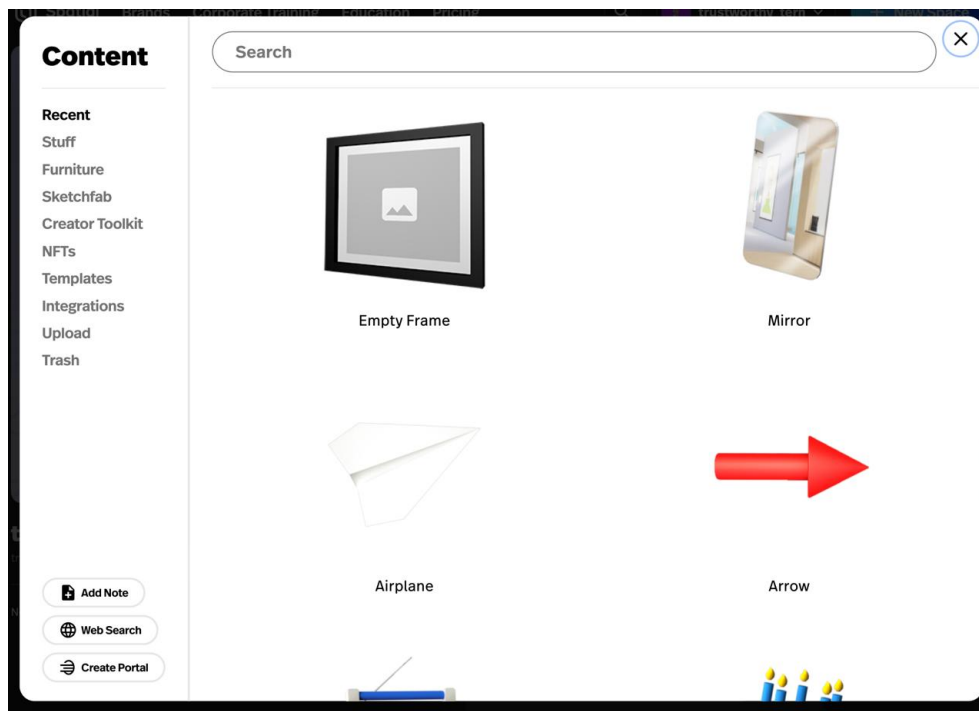

2. Expanding Your World: Importing Assets

You can bring in your own content or use external libraries:

- Google Drive: Import your personal images, videos, and documents.
- Sketchfab: Browse and insert millions of 3D models directly.

3. Placing & Editing Objects

- Inserting: Items (like Empty Frames) move relative to your camera angle.
- Options: Click an object to Lock, Duplicate, or Delete.
- Orientation: Use the gizmos to rotate and scale your items.

4. Pro Tips for Efficiency

- Layers Panel: Use this to find and select objects that are hidden or far away.
- Emotes: Press "T" for the emote menu or use number keys (1-9) for quick shortcuts.
- Avatar: Click your profile to customize your look anytime!
